Denton, TX 76201

For more information, call: (940) 565-2262

This Pre-K program will provide small group and individual session activities, two times a week for children ages 4 to 6 under the direction of Dr. Theresa Kouri. The program will target early language and literacy concepts, phonemic awareness, print awareness, and other literacy skills necessary for a successful transition into Kindergarten and 1st grade educational curriculums. Evidence based multisensory and traditional learning curriculums will be compared across classroom groups.

Full or partial scholarships are available to offset program costs.
